ACADEMIC PROJECTS

- ❖ **Full-Stack Blog Application with React & Appwrite** [View Project](#)
I developed a fully functional blog application using HTML, Tailwind CSS, JavaScript, and React.js, with Appwrite handling the backend services. It supports user authentication, CRUD operations, and a seamless UI for managing blog posts.
- ❖ **Personal Portfolio Website** [View Project](#)
My portfolio showcases all my projects, each mentioned and deployed on GitHub. It is built using HTML, Tailwind CSS, JavaScript, and Font Awesome icons for a sleek and responsive design.
- ❖ **Temperature Finder - APIs based Weather Application** [View Project](#)
This project utilizes HTML, CSS, and JavaScript for the frontend and integrates the OpenWeatherMap API to fetch real-time weather data.
- ❖ **Shiksham Classes – Modern Educational Website Frontend** [View Project](#)
I designed the user interface of an educational website using HTML and Bootstrap for a responsive layout. It includes images for visual appeal and integrates Google Maps to show location details for users.
